

VC2201 Pediatrics for the 21st Century: Addressing New Challenges to Prevent Injury

Saturday, October 9

1:00PM – 4:30PM CDT

Injury remains the leading cause of death in childhood, and disparities exist across race/ethnicity and socioeconomic status. This program will help pediatricians understand how to address child injury prevention by delivering culturally and linguistically appropriate care in the office and community, through advocacy, and by engaging with child death review systems.

- 1:00PM **Welcome**
Lee Savio Beers, MD, FAAP, AAP president
- 1:05PM **Introduction**
Moderator: Ben Hoffman, MD, FAAP
- 1:15PM **Critical Topics at Every Stage: Infancy Through College**
Andrew Kiragu, MD, FAAP

Emerging and Persistent Hazards

- 1:45PM **Double-Edged Sword: The Promise and Risk of Technological Advances in Motor Vehicles**
Torine Creppy
- 2:10PM **Why Different Populations Have Guns and Their Willingness to Use Locking Devices**
Rebecca Cunningham, MD
- 2:35PM **Q&A**
- 2:45PM **Break**

What You Can Do in Practice and Beyond (Panel)

- 3:00PM **Child Death Review as a Resource for Local Data and Recommendations**
Abby Collier, MS
- 3:20PM **Education and Empowerment: Preventing Injury in Your Practice and Beyond**
Karen Sheehan, MD, MPH, FAAP
- 3:40PM **Advocating for Effective Policy Change**
Yadira Caraveo, MD, FAAP
- 4:00PM **Q&A**
- 4:30PM **Adjourn**
