

VH1222 Joint Program: Council on Communications and Media and Committee on Native American Child Health

Overcoming Barriers to Effective Communication

Saturday, October 9
9:00AM – 11:00AM CDT

The thoughts, words, and actions we use to communicate in clinical and online settings impact knowledge transfer and health literacy. Many barriers conspire to diminish the effectiveness of communication. Among these are bias, diversity, misinformation, and self-regulation. This program will explore these barriers and provide practical tips for overcoming them.
