

VH1301 Joint Program: Section on Home Care, Section on Telehealth, and Council on Children With Disabilities

Role of Telehealth in the Care of Children With Medical Complexity

Sunday, October 10

8:00AM – 11:00AM CDT

Telehealth is an increasingly used modality to deliver care and support care coordination for children with medical complexity. This session will focus on how to deliver a successful telemedicine visit, including perspectives from providers and families, remote monitoring, and examples of multidisciplinary use.

8:00AM	Introduction <i>Moderators: Alison Curfman, MD, FAAP; Elaine Lin, MD, FAAP</i>
8:10AM	How to Implement Successful Telehealth Visits for Children With Medical Complexity: Pros/Cons and Integrating a Multidisciplinary Approach <i>Kathleen Webster, MD, MBA, FAAP</i>
8:50AM	Family Perspectives on and Experiences With Telehealth Visits for Children With Medical Complexity <i>Beth Dworetzky</i>
