

VH1305 Section on Neonatal-Perinatal Medicine Program: Day 3 Morning Innovations in Neonatal Care: Present and Future

Sunday, October 10

8:00AM – 12:00PM CDT

This program will focus on unique innovations from a system’s approach to improving neonatal care. Topics include improving outcomes for newborns in a neonatal neuro-intensive care unit who have brain injuries or are “at risk,” machine learning applied to retinopathy of prematurity screening, and neonatal airway evaluation and therapies.

8:00AM	Welcome <i>Moderators: James Barry, MD, FAAP; Janine Bernardo, MD, FAAP; Ravi Patel, MD, MSc, FAAP</i>
8:05AM	Young Investigators Awards <i>Moderator: Michael Posencheg, MD, FAAP</i> <i>Supported by Reckitt Mead Johnson, Proud Supporter of the American Academy of Pediatrics</i>
8:15AM	Update From the Committee on Fetus and Newborn <i>Eric Eichenwald, MD, FAAP</i>
8:45AM	Applications of Artificial Intelligence in Retinopathy of Prematurity Screening <i>Peter Campbell, MD, MPH</i>
9:25AM	Providing Brain-Focused Care: Minimizing Risk and Improving Outcomes for All NICU Patients <i>Sonia Bonifacio, MD, FAAP</i>
10:05AM	Break
10:20AM	POKE: Do for the Patient ... Never to the Patient – Driving and Sustaining Change Through Culture, Leadership, and Tools <i>Erick Ridout, MD, FAAP</i>
11:00AM	Dysphonia and Aspiration in Ex-Premature Children: Long-Term Consequences <i>Karen Zur, MD</i>
11:40AM	Q&A
12:00PM	Adjourn
