

VH1350 Joint Program: Section on Epidemiology, Public Health, and Evidence and Special Interest Group on Prevention and Public Health

Putting Evidence Into Practice: Reaching Across Disciplines to Improve Patient Care and Public Health

Sunday, October 10

1:00PM – 5:00PM CDT

With evidence related to pediatric practice being produced faster than ever, how can pediatricians keep up? During this program, we will explain how to synthesize evidence effectively using clinical guidelines and quality improvement publications. Important evidence related to children and COVID-19 also will be summarized.
