

VH1402 Section on Otolaryngology Program Evaluation and Management of Noisy Breathing

Monday, October 11

8:00AM – 12:00PM CDT

When an infant or child presents to the pediatrician with a chief complaint of noisy breathing, it is imperative that the clinician have a diagnostic algorithm to differentiate benign, self-limiting conditions from those that are potentially life-threatening. This program will review causes of noisy breathing and airway and chest imaging.

8:00AM	Introduction - Section 1 <i>Moderator: Kris Jatana, MD, FAAP</i>
	Symposium on Noisy Breathing for the Pediatrician <i>Moderator: Kristina Rosbe, MD, FAAP</i>
8:15AM	Infectious Causes of Pediatric Airway Obstruction <i>Brian Reilly, MD, FAAP</i>
8:45AM	Structural Airway Anomalies of the Larynx and Trachea <i>Diego Preciado, MD, PhD, FAAP</i>
9:15AM	Pulmonary Causes of Noisy Breathing: Asthma and Beyond <i>Jeffery Ewig, MD, FAAP</i>
9:45AM	Q&A
10:00AM	Break
10:15AM	Upper Airway Obstruction in Children <i>Kristina Rosbe, MD, FAAP</i>
10:45AM	Aerodigestive Foreign Bodies in Children <i>Kris Jatana, MD, FAAP</i>
11:15AM	Radiologic Review of Airway and Chest Imaging <i>Steven Blumer, MD, MBA, FAAP</i>
11:45AM	Pediatric Otolaryngology Advocacy Award <i>Award Presenter: Steven Sobol, MD, FAAP</i> <i>Award Recipient: Kristina Rosbe, MD, FAP</i>
12:00PM	Adjourn
