

VH1412 Section on Pediatric Pulmonology and Sleep Medicine Threats to Child Lung Health: Inhalants, Insomnia, Inequity

Monday October 11

9:00AM – 11:00AM CDT

Youth vaping, insomnia, and other sleep disorders increased with the stress associated with the pandemic. This program focuses on identifying and treating these common problems. We will discuss how social determinants of health and social chaos affect child lung health and ways to address inequity in our practices.

9:00AM	Welcome <i>Moderator: Emily DeBoer, MD, FAAP</i>
