

VH1456 Section on Radiology Program

Diagnosis and Management of Common Gastrointestinal Emergencies in Newborns and Young Infants

Monday, October 11

1:00PM – 3:00PM CDT

From hypertrophic pyloric stenosis to necrotizing enterocolitis, gastrointestinal (GI) emergencies are among the most common reasons for emergency visits in newborns and young infants. This program will engage participants in a review of the evidence for diagnosis as well medical and surgical management of common gastrointestinal conditions our youngest patients.
