1:00PM – 5:30PM

C1021 Peds 21: Opioids Through the Ages: Caring for Children and Families in the Wake of the Opioid Crisis

The opioid crisis reaches across all age, socioeconomic, and ethnic divides. This program will focus on how pediatricians and pediatric specialists can provide optimal pain management after surgery, injury, and in other clinical situations, while minimizing side effects and complications of opioid use. Attendees will learn how they can confront the opioid epidemic in their communities.

Supported in-part by the Conrad N. Hilton Foundation

1:00PM	Poster Session
