

Saturday, October 26

8:00AM – 1:00PM

H2022 Joint Program: Council on Children With Disabilities and Section on Developmental and Behavioral Pediatrics

What If It's Not...? Managing Uncertainty in Children With Developmental Concerns

Pediatricians often evaluate children who have atypical developmental trajectories, such as motor difficulties and social/behavioral problems. Sometimes, this population does not fit criteria for developmental disorders such as autism spectrum disorder or cerebral palsy. This program will discuss diagnostic dilemmas and strategies for partnering with families in the face of diagnostic uncertainty.

8:00AM	Welcome, Introduction, and Opening Remarks <i>Moderators: Garey Noritz, MD, FAAP; Carol Weitzman, MD, FAAP</i>
8:15AM	Family Perspectives on Uncertainties <i>Cara Coleman, JD, MPH</i>
8:45AM	When Is It Not Autism? <i>Alison Schonwald, MD, FAAP</i>
