Sunday, October 27
8:00AM – 1:00PM

**H3025 Joint Program: Council on Community Pediatrics, Section on International Child Health, and Section on International Medical Graduates**

Safe Haven in the US: Advancing the Health and Well-Being of Migrant and Refugee Families in Our Communities

Faculty will discuss the unique health and mental health concerns facing refugee children and families, including the impacts of trauma experienced throughout the migration journey. Attendees will learn strategies to increase children’s access to health care; how to build community partnerships; skills to work with medical interpreters; and opportunities to support families seeking asylum.

8:00AM  Welcome  
*Moderator: Christopher Peltier, MD, FAAP*
