

## Sunday, October 27

8:30AM – 1:30PM

### H3089 Section on Adolescent Health Program

#### Hot Topics in Adolescent Medicine

Adolescent medicine experts will discuss advances in the field of adolescent health care, including management of common and uncommon dermatologic conditions; unexplained fatigue in teenagers; manifestations of orthostatic intolerance; and diagnosis and management of fibromyalgia. The section business meeting also will be held, and awards will be presented.
