

Sunday, October 27

1:00PM – 3:30PM

H3135 Joint Program: Section on Neonatal-Perinatal Medicine and Section on Simulation and Innovative Learning Methods

Post-Event Debriefings in Neonatal Care

This program will educate neonatal health care providers on how to conduct post-event debriefings. These facilitated discussions of a clinical event differ from meetings to assist staff in managing emotionally taxing incidents. They focus on learning and performance improvement and have been shown to reduce equipment-related problems, and improve communication and teamwork.
