8:00AM – 12:30PM

H4024 Council on Child Abuse and Neglect Program

The Bare-Bones Truth: Comprehensive Clinical Evaluation of Fractures in Infants and Young Children

When faced with a diagnosis of an abusive fracture, some parents report that their child's fracture is due to a rare medical condition. Many courtrooms uphold these claims even though there may be little medical evidence to support the diagnosis. This program will outline a comprehensive, multidisciplinary evaluation of infant/child fractures to help differentiate true bone disease from physical abuse.

Moderator: Norrell Atkinson, MD, FAAP

- 8:00AM **Scientific Abstract Breakfast Session**
- 8:45AM **Top 3 Abstract Summaries**
- 9:00AM **Business Meeting and Award for Outstanding Service to Maltreated Children**
