

## Monday, October 28

9:00AM – 12:00PM

### H4075 Council on Environmental Health Program

Improving Environmental Health Histories and Advice: What Do We Know and Where Do We Go?

A core role of pediatricians is to educate families on preventing harm, including environmental exposures that may increase problems such as elevated blood lead levels and asthma exacerbations. This program will provide guidance, review resources, and offer innovative solutions for environmental history-taking and home risk assessment.

9:00AM	<b>Welcome and Introduction of Speakers</b>
9:05AM	<b>Pediatric Environmental Health History-Taking: State of the Art and State of the Evidence</b> <i>Maida Galvez MD, MPH, FAAP</i>
