

Monday, October 28

9:00AM – 12:00PM

H4076 Joint Program: Section on Radiology and Section on Neonatal-Perinatal Medicine

Perinatal Medicine: Newborn Management of Both Common and Complex Fetal Diagnoses

Improvements in fetal imaging allow increasingly accurate prenatal diagnosis. Most prenatal diagnoses will require follow-up by the pediatrician. This program will review the evidence for newborn care of antenatal diagnoses and discuss the pediatrician's role in providing guidance to caregivers regarding management.

- 9:00AM **Welcome**
Moderator: Hansel Otero, MD, FAAP
- 9:05AM **Perinatal Imaging of Mild and Incidental Abnormalities: Mild Hydrocephalus, Hydronephrosis, Club Foot, Clefts, Abdominal Cysts, Bowel Atresia, Spine, Hip**
Leslie Hirsig, MD, FAAP
- 9:50AM **Surgical Management of Common Prenatal Abnormalities**
Andrea Badillo, MD, FAAP
- 10:25AM **Break**
- 10:35AM **Fetal Imaging of Complex Anomalies: Myelomeningocele, Congenital Diaphragmatic Hernia, Congenital Pulmonary Airway Malformation, Central Nervous System, Omphalocele, Gastroschisis**
Dorothy Bulas, MD, FAAP
- 11:20AM **Surgeon's Perspective on Fetal and Delivery Room Interventions: Fetoscopic Endoluminal Tracheal Occlusion and Ex Utero Intrapartum Treatment**
Andrea Badillo, MD, FAAP
- 11:50AM **Q&A**
- 12:00PM **Adjourn**
