

## H2615 Joint Program: Section on Gastroenterology, Hepatology, and Nutrition and Council on Children With Disabilities

Feeding Challenges in Children: From Assessment to Recommendations in Your Office

Saturday, October 3  
5:30PM – 7:00PM CDT

Feeding challenges in typically developing children and children with special needs are stressful for families. Pediatricians often are asked to find the underlying cause and provide recommendations. This program will provide an overview of common challenges in oral and enteral feeding, dietary requirements, and strategies for the practitioner.

5:30PM	<b>Introduction</b> <i>Praveen Goday, MBBS, FAAP</i>
