

H3000 Joint Program: Section on Global Child Health, Section on Surgery, and Section on Bioethics

Beyond Short-Term Missions: Lessons for Medical and Surgical Disciplines

Sunday, October 4
8:00AM – 10:00AM CDT

This program will review the history of global health engagement from its roots in colonialism and mission-based trips to more sustainable partnerships, as well as ethical issues related to such engagement. Faculty will highlight global health engagement models from medical and surgical specialties that adhere to ethical standards and address capacity-building and systems-strengthening.
