

## H3803 Council on Injury, Violence, and Poison Prevention Program

Preventing Drowning: What Pediatricians Need to Do

Sunday, October 4

3:00PM – 5:00PM CDT

Drowning is a significant source of morbidity and the leading cause of injury death in US children ages 1 to 4 years and the third leading cause of unintentional injury death in 5- to 19- year-olds. Pediatricians should understand the risk factors in different populations and adjust their anticipatory guidance.
