

H3808 Section on Medicine-Pediatrics Program

Vaccine-Preventable Disease and Vaccine Refusal

Sunday, October 4

3:00PM – 5:00PM CDT

This program aims to improve pediatricians' skills in the care of children and vaccine-preventable disease. Attendees will learn effects of the growing numbers of unvaccinated children on disease outbreaks and during the COVID-19 pandemic. They also will learn the psychology of why families decline vaccines and methods to motivate them.

3:00PM	Welcome <i>Moderator: Kristin Wong, MD, FACP, FAAP</i>
3:10PM	Vaccine-Preventable Epidemics in a Pandemic: The Downstream Effects of Vaccine Refusal <i>David Cennimo, MD, FACP, FIDSA, FAAP</i>
